<b>2_ User List</b>	<b>1</b>
<b>3_ New User Registration Screen</b>	<b>2</b>
<b>4_ Selected User</b>	<b>2</b>

# Introduction

This document describes requirements, details related to UI components, the behavior of the page when using these components, what to show to the user at the beginning.

## 1\_ Page Structure

- Page should be divided into two pieces vertically.
- Left side should display the user list. More details given are in the “User List” title.
- Right side displays selected users details as well as a new user registration screen if opened. More details are given in the “New User Registration Screen” title and “Selected User” title.
- Whole top of the screen should be left for a header which will be used to place buttons on it.

## 2\_ User List

- On top there should be table header row separating following data: Id, User Name, Email, Enabled Status
- On the table header there should be sorting options for each individual data type (Such as by name order or by email order).
- There should be an option to filter disabled users. Checkmark should be placed on the page header for this.

## 3\_ New User Registration Screen

- This screen should be opened as a trigger when the “New User” button on the page header is clicked.
- There should be following areas to be filled by user: Username, Display Name, Phone Number, Email, User Roles, Enabled
- Name boxes only should accept input as letters.
- Phone number box only should accept input as number.
- User Roles box should be selectable menu which includes following selectable roles: Guest, Admin, Superadmin
- Enabled box should be a checkmark button.
- Save User button should be located at the right side of the page header. If there is missing information, the button should fade to gray.

- Users should be saved with a unique ID.
- There should be an error popup with an error description if the registration process fails.

## 4\_ Selected User

- This screen should be opened when a user is clicked on the user list.
- If new user registration is in process when a user is clicked on the user list, a confirmation popup should show to cancel registration.
- Everything except the unique id should be editable here.
- There should be a button to delete the user.
